Pope 101pbc33 User Manual Introduction

The Pope in Ireland

"This fascinating dictionary gives concise accounts of every officially recognized pope in history, from St Peter to Pope Francis, as well as all of their irregularly elected rivals, the so-called antipopes. Each pope and antipope's entry covers his family and social background and pre-papal career as well as his activities in office. Also, an appendix provides a detailed discussion and analysis of the tradition that there has been a female pope. This new edition reflects the very latest in papal research and contains additional information in the further reading sections of each entry, making this dictionary an even more useful starting place for research into specific pontiffs. This is a continuous history of the papacy over almost 2,000 years. It reveals how, for much of that history, spiritual and temporal power have been inextricably mingled in the person of the pope. A fascinating read for students of theology and history, as well as the general reader with an interest in Christian history"--

A Dictionary of Popes

The papacy is the oldest of all Western institutions with an unbroken existence over almost 2,000 years. In this unique reference, J.N.D. Kelly provides a concise entry on each pope, chronologically arranged so that the book reads as a continuous history of the papacy. He covers not only all the officially recognized popes from St. Peter to John Paul II but also their irregularly elected rivals, the so-called antipopes.

How to Be Pope

Originally published in New York 1916. PREFACE: THIS book presents practical working directions for the design and construction of womens clothing, including various kinds of outer- and undergarments. It includes problems embracing the fundamental principles involved in the selection and design of clothing the theory and use of color pattern-making and clothing construction. As the mission of the text is chiefly the exposition of constructive processes, the selection of apparel and choice of material has been treated in a manner as best fitted into the scheme of the book. A more scientific treatment of textiles may be found in the numerous texts listed in the bibliography. The construction of garments has been approached from the standpoint of those who have had instruction in elementary sewing. For those who have not had such instruction, a review of the fundamental stitches, and some simple processes, have been included in the section on undergarments. When used in schools and colleges, it is not intended that the subject matter be taken bodily from the text for classroom use, but rather that a selection of problems be assigned by the teacher, that will best fit the needs of students, and the time allotted to the subject in the curriculum and that the text in the hands of students be supplemented by the teachers instruction. It is important that teachers read the section written for them, which is intended to aid in an intelligent use of the text pp. 426-437. In the home, the text will, it is believed, serve as a reliable handbook to the woman who makes her own clothing or supervises its construction while the woman who purchases ready to wear garments will receive help in her selection by the standards suggested here. Special suggestions for the homewomen are given pp. 437-439... LAURA I. BALDT Teachers College, Columbia University, New York City, April, 1916. CONTENTS include: CHAPTER I.
